

JLG Forklift Parts

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora set out on a cross country excursion in their RV. Freshly retired, after spending several years working with his brother to build their crane company into an market leader, John had no idea that fatefull trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision materials handling technologies was the end result of a road expedition.

Whilst on their journey, John spent time talking to former business acquaintances whom the Groves stopped to see along the way. These conversations combined with a tragic incident-two workers being electrocuted on scaffolding when the Groves were traveling to the Hoover Dam- John discovered a vast market for a product that could promptly and securely elevate people in the air to accomplish upkeep and other construction functions.

Upon returning from their travels, John formed a joint venture with two friends and obtained a metal fabrication company in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty personnel, they designed and sold the first JLG aerial work platform. The company incorporates some of the simple design essentials of that original lift into existing designs.

Since then, JLG Forklifts have come a great distance from when Mr. John L. Grove came back from his fatefull cross-country trip and since the first JLG aerial platform entered the market. As of today, the company has expanded itself into a number of global markets and continues to cultivate new machines to ensure that consumers are able to become safer and more resourceful within their workplace.
