

Barrel Clamps

Barrel Clamps - Known as "Barrel Clamp", this hydraulic accessory is utilized on lift trucks so as to compress items which you want to move utilizing the lift truck. Typically, they are used in order to handle kegs, paper rolls and barrels, together with some barrel clamp designs being able to rotate the load. Like for example, the rotate function allows the individual operating the forklift to be able to put in a vertically stored paper inside the horizontal intake of a printing press.
